

Social media threats Matrix

Learning Content phase	Learning outcome	Teaching /Learning objectives	Learning Activities (actions and teaching methods to meet the objectives)	Teacher/trainer activities (What is the role of the teacher/trainer and what is he/she going to do?)	Communication and Collaboration form	Resources , tools, and media
Introduction and orientation 20 minutes	Understand the cybersecurity risks associated with social media	<ul style="list-style-type: none"> - Explore common cybersecurity threats and vulnerabilities related to social media - Identify potential risks and consequences of social media usage - Understand the importance of protecting personal information online 	<ul style="list-style-type: none"> -Use learning video to watch social media based attacks. - Use learning video to watch general strategies to prevent main types of social media based attacks. -Discussion (Questions and Answers, brainstorming) 	Guide participants using learning media and discussions, ensuring clarity and addressing misconceptions.	Verbal and Guided	Learning videos LMS
Lesson Execution -15 minutes	Analyse the impact of social media on cybersecurity	<p>Examine real-world examples of cyber-attacks and privacy breaches through social media</p> <ul style="list-style-type: none"> - Analyse the techniques used by attackers to exploit social media platforms - Identify the potential consequences of compromised social media accounts 	-Discussion (Questions and Answers, brainstorming)	Present real-world social media threats examples, moderate discussions, ensuring knowledge is practically applied and understood.	Verbal and Guided	Learning videos LMS
	Evaluate the best practices for securing social media accounts and mitigating cybersecurity risks	<ul style="list-style-type: none"> - Assess the importance of strong passwords, two-factor authentication, and privacy settings - Evaluate the effectiveness of security measures in preventing social media-related threats - Identify strategies for educating and raising awareness about cybersecurity risks in social media - Evaluate the ethical considerations of social media cybersecurity and the responsibilities of social media platforms in ensuring user privacy and data protection 				
Evaluation – 10 minutes	Evaluation of students / lesson / teacher	<ul style="list-style-type: none"> - Recognize social media attacks of different types. - Know strategies to prevent and mitigate social media threats. 	Students will take an online evaluation assessment / quiz in the LMS and will get the results	Clearly instruct on evaluation and feedback procedures, assist with any issues, and encourage feedback while ensuring all responses are collected for future reflection.	Verbal/Guided	LMS/Quiz
